

Political Science and International Relations : International Political Economy

Parker, Owen, Tsarouhas, Dimitirs (Eds.), University of Sheffield, Sheffield, UK

# Crisis in the Eurozone Periphery

The Political Economies of Greece, Spain, Ireland and Portugal

- Addresses the underlying causes and effects of the Eurozone crisis in four of the states most impacted
- Draws on a team of country experts to assess the causes and consequences of crisis
- Explores the wider implications of the crisis with respect to the longevity of the Eurozone in terms of its major institutional features
- Locates these in the broader context of international political economy

This book investigates the causes and consequences of crisis in four countries of the Eurozone periphery – Greece, Spain, Portugal and Ireland. The contributions to this volume are provided from country-specific experts, and are organised into two themed subsections: the first analyses the economic dynamics at play in relation to each state, whilst the second considers their respective political situations. The work debates what made these states particularly susceptible to crisis, the response to the crisis and its resultant effects, as well as the manifestation of resistance to austerity. In doing so, Parker and Tsarouhas consider the implications of continued fragilities in the Eurozone both for these countries and for European integration more generally.
